

The most versatile EPA Registered disinfectant for the restoration professional.

CAN YOUR DISINFECTANT SAY ALL THIS?

Every project is unique. You need the right tools to handle the situation quickly, easily, and cost effectively.

ShockWave is the only tool you'll need for sewer cleanup, mold remediation, disinfection, porous surface sanitization, deodorizing or infectious organisms.

- Effective in 98% soil load
- Over 130 organism kill claims
- Effective in 791 ppm hard water
- Approved for use against H5N1 Avian Flu
- Registered for sewage/black water remediation
- Sanitizes porous and disinfects non-porous materials

ShockWave is a state-of-the-art disinfection/sanitizer/cleaner designed to handle any situation a remediation professional might encounter.

ShockWave has been formulated, tested, and is registered by the EPA for use on more surfaces, in more situations, and to kill more organisms than any other product.

WHY SHOCKWAVE?

When demonstrating efficacy, **ShockWave** was tested successfully in the presence of a 98% organic soil load as opposed to the EPA minimum and industry norm of 5%. In these conditions a “real world” situation is more closely replicated in the laboratory, where organic matter does not self-dilute down to 5%. Although the EPA does not require extreme testing, and no other manufacturer attempts this, it is the only way to demonstrate how effective a product will be when used in actual field conditions.

PROPERTIES

Active Ingredient: Quaternary Ammonium Chlorides

Odor: Light Fragrance

pH: 10-12

Dilution (Concentrate): 2 oz. per gallon

Storage/Stability: 2 Years

Packaged (Concentrate): One Gallon & 10oz. Bottles

Packaged (RTU): One & Five Gallon

EFFICACY & USE

ShockWave is EPA Registered to kill more organisms than any other product, including *Aspergillus niger*, MRSA, Norwalk Virus, Avian influenza, *Candida albicans* and *Streptococcus pneumoniae*.

ShockWave is EPA Registered for use in water damage restoration, carpet sanitization, sewer backups (black water & gray water), on porous & non-porous materials, and non-food contact surfaces.
