2  SUMMER 2020
The Storm System is designed to stand up to whatever comes down. Whether it’s months of baking sunlight and damaging ultraviolet rays, seemingly endless rain or brutal winters marked by ongoing cycles of freezing and thawing, there’s a Storm System finish engineered to withstand it. Using familiar weather color-coding and phrases, the Storm System is organized in five categories based on the level of opacity, degree of UV protection and typical longevity of each finish.

### 15% OFF KM CONTRACTOR ACCOUNT PRICE

SHOCKWAVE RTU
Virucidal Disinfectant
ShockWave has been formulated, tested, and is registered by the EPA for use on more surfaces, in more situations, and to kill more organisms than any other product and is included on EPA List N Disinfectants for Use Against SARS-CoV-2 (COVID-19). Shockwave was evaluated with the Titan Impact® 440 and 410 delivery system for two common hazardous scenarios:

1) PANDEMIC PREVENTION: Application to a large range of surfaces for pandemic prevention and/or surface hygiene for localized outbreaks.

2) FLOOD COAT (Flood/Storm Recovery): Disinfection and sanitizing surfaces impacted by flooding and water intrusion, including CAT3 “Black Water”.

5 Gallon 61181 $89.99

- White T-Shirt 4 lbs: $8.99
- White T-Shirt 8 lbs: $14.99
**High Density Painter’s Plastic**

Our new Kelly-Moore High Density Painter’s Plastic features:

- Paint flake resistant - dried paint sticks for quick and easy clean-up
- Better adhesion for painter’s tape
- Superior cling & fold pattern
- 100% guaranteed quality and durability
- Non-slip film
- Bilingual packaging
- Easy to unfold and install
- For Professional and DIY use
- Easy-to-use dispensing box

**How to Install:**

When dispensing the plastic, notice the arrow that points toward the edge. The edge overlaps the fold in the plastic, making it quick to find the top edge (the unfolded plastic has enough cling to hold it to the wall prior to separating/unfolding).

Line the unfolded plastic around the room to be masked. “This Side Out” should be visible on the plastic and facing out. This side is treated, and acts like a vacuum to hold paint and dust – the opposite side of the plastic (against the wall) has the cling property.

Once the plastic is cut to the proper length, slide the edge of the plastic to where it will be taped. Either tape the top edge of the plastic prior to separating, or simply hold the top edge of the plastic with one hand and pull down/separate the plastic with the other hand. The plastic can be adjusted after the film is separated before taping.

**Flake Resistance**

At Select Participating Stores. May require special order. See Store Manager for Details.
KELLY-MOORE PAINTER’S TAPE

Beige General Purpose Painter’s Tape
Our KM crepe paper masking tape is designed for commercial and residential painting and construction, industrial masking, holding, and packaging. Good for applications where conformity to irregularly-shaped surfaces and good quick stick are required.
Features include:
- Good flexibility and conformability
- Quick stick
- Water and oil resistant
- Easy release

1.0 Tape 10236 $1.69
1.5 Tape 10237 $2.69
2.0 Tape 10238 $3.19

Blue Multi-Surface Painter’s Tape
Kelly-Moore’s Blue Multi-Surface Tape is a medium adhesion masking tape. It removes cleanly from painted walls, trim, woodwork, glass and metal for up to 14 days without damage, even when exposed to direct or indirect sunlight.

1.0 Blue Tape 34271 $2.99
1.5 Blue Tape 34272 $4.49
2.0 Blue Tape 34273 $5.99
24mm Blue Tape 6 Pack 52583 $14.99
36mm Blue Tape 4 Pack 52584 $14.99

FROG TAPE

Frog Tape® is the only painter’s tape treated with PaintBlock® Technology. PaintBlock® is a super-absorbent polymer which reacts with latex paint and instantly gels to form a micro-barrier that seals the edges of the tape, preventing paint bleed.

Pro Grade Blue Tape
1.41” x 60 yd - 4 Pack 60770 $19.99
