

DTM

HIGH PERFORMANCE

INTERIOR/EXTERIOR
DIRECT TO METAL

Primer and Finish Coating

Excellent Adhesion

Flash Rust Resistant

Inhibits Corrosion

Protects Against UV Damage

Direct To Metal

DTM is a high performance, single-component waterborne coating that provides a smooth, durable finish over a variety of metal surfaces including iron, steel, galvanized and aluminum. The self-priming formula is designed for superior adhesion, outstanding corrosion resistance, and long-lasting UV protection.

Perfect for doors, handrails, structural steel and much more in residential, commercial, and light industrial applications.
